

BF200 Duplex Bag Filter Filtration Unit

At Adler Tank Rentals, we are committed to providing safe and reliable containment solutions and accessories for all types of industry applications.

Our BF200 Duplex bag filter will handle flows up to 200 GPM and operating pressures up to 125 PSI max. The internal filters will remove large particulates and sediments and are replaceable with filtration capacities from 100 to 1-micron nominal rating. The unit is skid-mounted for ease of handling, can be used as a stand-alone unit or mani-folded together to handle increased flow rates and is used in various filtration applications to provide an efficient solution on any job site.

Mechanical Features

- Dual high flow bag filtration
- Manifold valving for easy isolation
- Skid-mounted design with lifting bail
- Replaceable bag filter from 100 to 1 micron
- Fitted with bleed valves and pressure gauges
- Constructed of 316 Stainless steel
- 3" Inlet and outlet manifolds

Max Flow: 200 GPM
Material: 316 Stainless Steel
Max PSI: 125 PSI
Approximate Weight: 800 lbs.
Dimensions: 24"W x 54"L x 66"H
Connections: 3" x 3" Flange
All sizes are approximate

BF200 Duplex Bag Filter

Applications

- Sediment remediation
- Environmental remediation
- Industrial and commercial process fluids

Comprehensive Service

Comprehensive Service: Adler Tank Rentals provides containment solutions for hazardous and non-hazardous liquids and solids. We offer 24-hour emergency service, expert planning assistance, transportation, repair and cleaning services. All of our rental equipment is serviced by experienced Adler technicians and tested to exceed even the most stringent industry standards.
